SUMMARY OF QUALIFICATIONS

I am a highly motivated and focused professional with postgraduate in computing, believing the cutting-edge technology will hugely impact our daily life as well as the way we are facing our challenges on business. As a strategic thinker with great communication and interpersonal skills, I really enjoy communicating ideas, collaborating and sharing knowledge with business partners and stakeholders. My self-taught experiences gain me considerable confidence and learning skills to fit into more challenge environment. I am getting ready to join a professional team and expose to a wide range of challenges and opportunities to grow.

Technical Expertise: React, JavaScript, Object-oriented Programming, Redux, Node.js, Express.js, CommonJS, HTML, CSS, Bootstrap, RESTful API, Git, SQL, SQL Server, MongoDB.

CORE COMPETENCIES

In-depth knowledge and practical experience of front-end programming and IT troubleshooting:

- Practical experience in programming by creating real world applications, such as my portfolio website, to do list projects, “vidly” backend RESTful services etc.
- In-depth knowledge of object-oriented programming (OOP), enjoy writing clean, reusable and easy maintaining codes, all my projects will be well refactored with OOP mindset before production deployment.
- Practical and high problem-solving skills, my curiosity and self-taught skills motivate me to find a better solution on an existing challenge. I learn Redux to resolve data transferring issues when using fake online API.
- Solid understand of the fundamental of JavaScript, which benefits my learning of different innovative JavaScript framework or features, such as I extend my ability to develop backend services with Node.js.
- High attention to detail, seeks details and background information to fully understand every presented situation.

Exceptional organisational and collaborative abilities:

- Able to work individually, while recognising the importance of team unity and collaboration to achieve the overall goals of the team. I have received good reviews on collaborative skills from my manager.

- High willingness to share knowledge and skills and contribute to a positive work environment which nurtures a culture of effectiveness and efficiency in the workplace. I was assigned as trainer of Shopify and Google Ads in my team.
- Highly capable of managing work demands, effectively organises time and is able to submit projects and complete deliverables on time without sacrificing the quality of work.

Highly developed communication and reporting skills:

- Consistently demonstrates good communication skills through clear and precise presentations.
- Great customer service skills and stakeholder relationship building.
- Capable of presenting data in a simple, logical and meaningful way creating report that show meaning in values and findings.

EXAMPLES OF TECHNICAL PROJECTS

- Build up personal portfolio website or landing page Example with basic CSS and HTML without framework.
- As speak to project, I produced a backend RESTful API for vidly app with Node.js, using CommonJS modules to refactor the code and apply middleware function to catch and log the exceptions and rejections.
- Developing to-do-list app using React library and bootstrap framework

PROFESSIONAL EXPERIENCE

DTVape LTD Part-time *2018 Jun – 2019 Feb*

Web Developer

- Shopify platform configuration & parameters management and maintenance.
- Shopify third party themes/apps customizations and implementation.
